The Best Thing
About Being Me
Is I Ain't You

Language from Oblivion

SURVIVAL FANTASY VS. SURVIVAL REALITY

Survivalism like any other field of interest has its own misconceptions. These inaccuracies arise for many reasons including ignorance, misrepresentation in the media, or just plain stupidity among those whom would consider themselves "survivalists."

One popular misconception which has to do with the image aspect of survivalists. It's not hazardous like the next fantasies are but annoying nevertheless. At the height of the media frenzy over survivalists the general view was we are a lot of angry white rednecks usually of a ultra-right wing persuasion.

However- most of the ones I know are multiethnic freaks with colored hair, lots of facial jewelry, and of anarchist/ nihilist leanings. We encompass a cross section of the Amerikan population. Some you wouldn't recognize walking down the street. Some others whom I'd consider to be survivalists don't even know they are. We are the rich, poor, right, left, black, white, men, wimmin, young, old, gay, straight- in short- we are everywhere!

Another illusion which is very dangerous is the fantasy of survival through purely deadly force. People who practice this believe they're impregnable just because they have a gun, some ammo, and think they know how to kill. We're talking about tunnel-visioned dipshits that will sleep with a pistol next to their bed but don't have a fire extinguisher in their house or carry condoms when they go out partying. Statistically speaking you're more likely to have a fire in your home than someone breaking into it with a gun. Plus, personally speaking I'd rather be shot than being burned to death or dying of AIDS. If you've ever seen pictures of either- I'm sure you'd agree. Survivalists should strive towards preparing for threats against life and liberty at all levels not just two-legged ones; including natural disasters, fires, medical emergencies, and even alien invasion (just kidding!).

The final illusion which can be just as dangerous as the last, is the fantasy of possession over knowledge. This is partially the doing of businesses making money by marketing hi-tech survival toys while pitching the "you'd wish you bought this before the crash" line to boost sales. While some of these products are bargains and very useful, many others are either overpriced, unnecessary, or could be made yourself. There are two hazards in this "survival consumerism." The first one, is that it fosters overdependence upon technology. There's nothing wrong with wanting to make life easier but if you say use your GPS (Global Positioning System) receiver so much that your map and compass skills got rusty, you're in trouble. The second one, is that it encourages survivalists to forget the two most important pieces of equipment one could have and which cannot be bought in any store- common sense and the ability to improvise! These abilities can only be developed through practice and observation of those knowledgeable in DIY techniques. Remember your mind is your primary weapon- Amen.

PRECARIOUS POST DEPT.

LETTER BOMBS TO THE DOKTOR

Hi Man!

I believe in the coming CHAOS and APOCALYPSE, it will come in different ways, some of it is already happening right now.

The EARTH and NATURE will just make a big clean up because everything is out of balance. I know about shit going to happen soon and if someone thinks the last few hundred years of HUMAN HISTORY were bad enough, well I have some NEWS for them: it will get even worse.

In many ways, form CLIMATIC COLLAPSE, NUCLEAR ACCIDENTS, NUCLEAR CONFLICT, POLITICAL RIOTS, DICTATORSHIP, POLICE STATE SYSTEM, etc.

There's much shit going on, some kind of CONSPIRACY (or more) with the intervention of one or more ALIEN entites, there are serious plans for a NEW WORLD ORDER that means a WORLD DICTATORSHIP, there's underground CONCENTRATION CAMPS prepared and some more STRANGE and SCARY stuff going on around us, we just don't realize, so I'm very interested in the stuff you write about in "POISON PEN." Send please some. I send you \$5 and IRC.

Thanx a lot. Take care. They may take
lives but won't take our souls.

Berlin, Germany

Dear NSF-

Greetings from us here at Rieter's World. I never really mentioned how much I throughly enjoyed your zine Poison Pen. I can only aspire to the greatness of KAOS your zine expressses. For our next issue I was going to write something about people just randomly murdering people. Like this one guy where someone rear-ended a boat he was towing. So he shoots the two people and two more by standers, killing 3 and wounding 1. I was going to write about how more people need to be doing this. Maybe then people realize how close this society is to colaspse, like a cracking dam. And we're the water behind it. Anyway, did like your latest issue in trade. If you haven't put out a new issue just give me an old one, as i've lost my copy.

Thanks,

R. "Biggs"
Torrance, CA

Dear Dr. Malicious-

I liked your zine! I am KS8ROS (ham radio) + had FFL, survival stuff and take Amerikan Survival Guide. Tell Gloria hi and thanxs! Do I owe her any \$?
Here's \$20.00 cash for you and your work- keep me on your list.

T.E.
W. Unity, OH

Hey,

Your publication is very Fucked up and knowledgeable, or something. Anyway, send issues #2 and #3, here's \$2.50. Fuck the World indeed. Just when I saw the cover of issue #1, proudly declaring, "Fuck The System." It brought chills to my spine. It raised an important question in my mind, why don't our history textbooks and novels proclaim that important message? After all, no 3 words in the English language fit together as beautifully as "Fuck", "the", and "system."

Yeah anyway I am 16 and hating life. I work for fucking McDonald's, one of the most powerful bullshit corporations in Amerika today. I would like nothing more than to poison a Fucked up customer with rotten food. They would inevitably sue, and put the shithole McD corporation on its ass. But right now I am just trying to make dough to buy cool shit like your zine. It is fun, though to think of how much you could fuck someone up just by serving them spoiled food.

They deserve it anyway, for giving into the needs of money grubbing corporation fuckheads, and for eating meat, not for means of survival but for means of self-satisfaction. It sickens me how little kids are brainwashed into thinking its OK to eat meat by their yuppie ass parents and by society as a whole. Fuck them, meanwhile the corporate fuckheads hide behind the pedophile face of Ronald McDonald. When the time comes, hopefully McFuckin Donalds will be the first to go.

Anyway, thanks alot and send a bunch of stickers, shit etc. along with your publications. Kaos Lives.

Brecksville, OH

I had to reopen this letter cause I figured out that the zine address is the same for the person who wants to exchange info. I thought I had two dollars but I didn't. That's all I have for the zine (#3) can you still send me a copy? Here's some info on cheap living if your on the streets or don't just have money for it. Food- At Target shopping malls check the garbage, they can't do anything about it or sit at a table and just wait there stop a person throwing out a tray usually unfinished food. Want safety pins?? Just stop in at your local tailoring, laundry cleaners and ask for some- they usually say yes and give you a handful. Need a place to sleep?? Check out thr recycle dumpsters (Editor's note- we DONOT recommend crashing in dumpsters. A friend of ours did this and almost got crushed to death when a compactor truck came to pick up the trash!!!) with just paper in them or check out churches. For public transportation there are two or three ways to fuck over the Metra trains. 1) Run on up the stairs and lay yourself down on your back in the walkway so the conductor can't see you. When your stop comes slide yourself down to the stairs hide there until the doors open and run off. 2) Simply just hide in the bathroom. 3) This one worked recently- get on the train go up stairs and act like your really disorganized start going through your pockets (bring a back pack) start going through your backpack, when the conductor comes tell him if you can get off at the next stop (cause you have no money). You might have an asshole for a conductor, and tell you to get off, but sometimes they'll say it's alright. If they kick you off get on the next train. If you want to try and get pizza call up and order pizza from a pay phone or find a phone connection behind someone's house. Don't pick it up wait about 45 minutes to an hour. Walk in to the pizza place waer a dirty shirt to look like your homeless if you're not and ask them if they have any pizzas no one came to pick up or no one wants. Maybe you'll get a free one. I think my friend did something similiar and it worked. If you're looking for bomb books check out Delta Press. I want to learn more, help me out I can't afford bomb books and shit.

POWER

Later,

Glenview, IL

Hello Daniel,

Well I am writing to request copies of Poison Pen. Hopefully you still have copies of #1 and #2. I have included \$3 for overhead and postage. Anyway if you need and additional writers I am serious about contributing. I have experience in many fields such as law, specialized firearms, scanning, etc. Just asking and look forward to hearing from you.

Solidarity,

Concord, CA

Daniel,

As usual, Poison Pen #3 was a great read, very interesting and full of useful advice. I know someone who may be interested in your zine. He is a survival fan too, only he is a multi-millionaire convinced that he has prepared for The End. Has lots of guns, farmland, vegetable garden, etc. He's pretty cool.

Your format is neat. I like the department names you use, like "Four legs good, two legs bad", "Choking Victim" and "Industrial Terrorism." Great stuff.

Yes, I've read "the Handmaid's Tale." Also have seen the movie. Those "Compucards" scare me! Only in this day and age, they call them debt cards. I don't trust'em. Give me cold hard cash any day. Jocks just about make me sick. They don't do shit and they make millions. We deserve that money! At least we can write, right?! Later!

Fort Wayne, IN

Hi Daniel,

I noticed in SL+Lt. #43 about your zine, think you are doing a good service, however please take some advice by an old timer okay.

I've done it all + I've been there so nothing could shock me today. I do hope you are using an alias + #2 that you are renting a postal box that's mandatory to do especially in what you print today even if you use the guise "for educational reasons only", your govt. or the creeps out there passing of as such only want today to fill up prisons so they are hip on what you scribble + all it takes is some asshole to flip on you + say yeah I read it in that zine then its a conspiracy charge + that's a charge that's hard to beat, not impossible just hard to do. Noooo please don't mail me a sample copy, the state won't let me have it anyway. Take care and be and stay well.

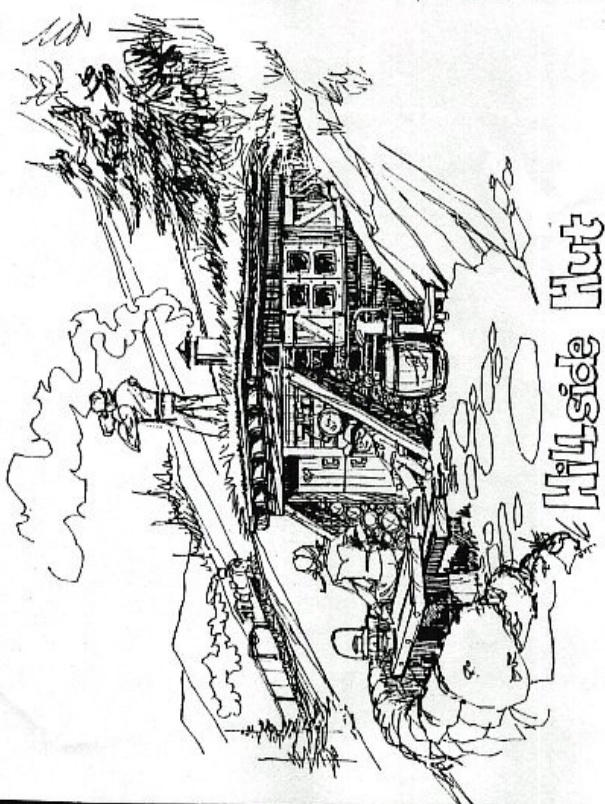

Best Wishes,

R.M.
Wallkill, NY

Signs of sytem kollapse

- 1) Komplete breakdown of the following- the central politikal organization, the central economy, and the traditional ruling class.
- 2) Widespread depopulation of towns and cities (running to hills syndrome).

Raise your hand if you've ever wanted to do this.

Hillside Hut

PERHAPS YOU KNOW OF A SPOT NEAR AN OLD RAILROAD WHERE YOU COULD HAVE A LOAD OF USED RAILROAD TIES DROPPED. THEY COST ANYWHERE FROM \$1.00 TO \$2.00 A PIECE, DEPENDING ON THEIR CONDITION AND AVAILABILITY. THIS HILLSIDE HUT REQUIRES APPROXIMATELY 60 OF THEM. USE A CHAIN SAW TO CUT THE TIES, AND PLAN ON REPLACING THE CHAIN WHEN YOU ARE FINISHED.

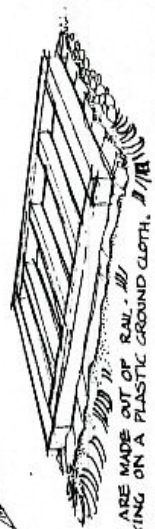

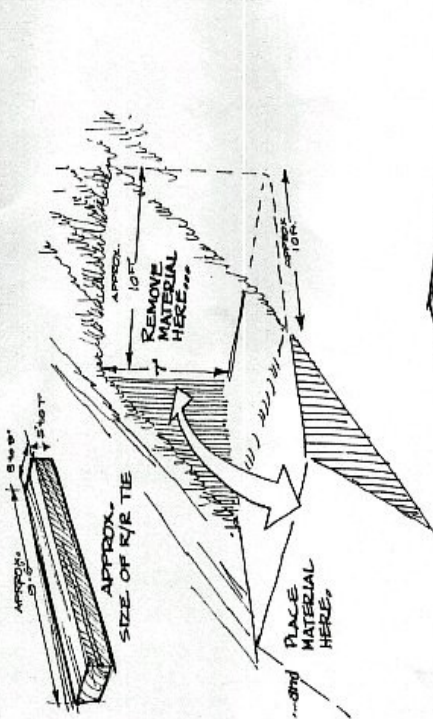

103

ALCO

GI

BEGIN BY EXCAVATING THE SIDE OF THE HILL. THIS CAN BE DONE WITH PICK AND SHOVEL. HOWEVER, THE MOST EFFICIENT AND QUICKEST WAY IS TO BLAST IT OUT WITH DYNAMITE. YOU CAN LEARN HOW TO SAFELY USE EXPLOSIVES BY WRITING TO THE INSTITUTE OF MAKERS OF EXPLOSIVES, 420 LEXINGTON AVE., N.Y., AND ASK THEM FOR THEIR BOOKLET "EXPLOSIVES IN AGRICULTURE" OR YOU CAN HIRE A PROFESSIONAL BLASTER AND ASK HIM TO TEACH YOU. ONCE YOU ARE FAMILIAR WITH EXPLOSIVES YOU CAN APPLY FOR A LICENSE TO BUY AND USE EXPLOSIVES THROUGH YOUR DEPT. OF LABOR. (COST \$40 IN N.Y. STATE)

WHATEVER METHOD YOU CHOOSE, THROW THE EXCAVATED MATERIAL TO THE FRONT SO THAT WHAT COMES OUT OF THE GROUND IS USED TO BUILD A LEVEL PLATFORM.

FLOOR BEAMS ARE MADE OUT OF RAILROAD TIES LYING ON A PLASTIC GROUND CLOTH. BEFORE BACK FILLING, DIG A DRAINAGE DITCH AROUND THE PERIMETER. FILL WITH LOOSE EGGS AND COVER WITH BUILDING PAPER.

 e-black and
 thled.

Drying fruits and vegetables is an excellent way to keep these items for more than a week or two. Dried fruits and vegetables will under optimal conditions keep for six-twelve months. Both can be dried inside with an easily made dryer although fruits tolerate the process better. Some fruits and all vegetables must be prepared before drying. Fruits sometimes oxide when heated causing discoloration and vitamin loss. One way to avoid oxidization is to treat the fruit in a solution of water and sodium metasilicate (which is available in wine making shops). Simply slice the fruit, leave them in a mixture of 2 teaspoons of metasilicate to a gallon of water for ten minutes then remove and drain them. Vegetables must be prepared by a process called blanching. Blanching destroys the enzymes that spoil the food during storage. To do this you stir in the vegetables in boiling water- using only enough water to cover the vegetables, then cover the saucepan until blanching is complete. You should reuse the same water for blanching additional batches of the same vegetable, adding new water as necessary. Below is shown charts showing the correct preparation times for fruits and vegetables.

An indoor dryer can be easily made by using a wooden box in which five-six trays can be stacked above a heat source which is placed at the bottom of the box. This heat source can be an electric hot plate, heater in which the element faces up, or a cluster of three 150-200 watt light bulbs. The tray supports should be 2"-4" apart, leaving a minimum of 6" towards the top and bottom of the box. Also ventilation holes should be put in around the top sides of the box. Two accessories are helpful as well- a small fan to duplicate a natural draft while preventing heat build up and a thermometer to make the temperature is maintained between 140 and 150 degrees.

Drying Fruit

Fruit	How to prepare	Treatment before drying	Test for dryness (Cool a piece before testing)
Apples Firm varieties: Greening, Yellow Newman, Golden, Rome Beauty, Jonathan	Wash, cut off stem ends, either cut into slices or dice apples into 1/2-inch rings or cut into 1/4-inch slices, removing cores	Soaking is preferred. Use 2 teaspoons silica per quart of water.	Soft, leathery, pliable
Apricots Blenheim, (Sweet), later	Wash, cut in half, remove pits	Soaking is preferred. Use 1 teaspoon silica per quart of water.	Soft, pliable, slightly moist in center when cut
Figs Black Mission, Kadota	Wash, leave figs on vine, when fully ripe and ready for drying, they fall to the ground. Wash, cut in half or leave whole	No treatment necessary	Leathery outside but soft pliable. Slightly sticky inside. Not very wet
Grapes Thompson Seedless, Mission	Wash, leave whole. Leave stems on until after fruit is dried	No treatment necessary	Rounded but leathery, wrinkled
Plums Black, Green, and Princes Freestone varieties	Wash, cut in half, remove pits. Freezing not necessary but will result in better-looking dried fruit	Soaking is preferred. Use 2 tablespoons water per quart of water	Soft, pliable, slightly moist in center when cut
Pears Bartlett	Wash, peel, cut in half, remove pits	Soaking is preferred. Use 2 teaspoons silica per quart of water	Soft, pliable, slightly moist in center when cut
Pineapples Fruit, Smooth, and Water	Wash, cut in half, remove pits	No treatment necessary	Fruit firm but not sticky

 how

GUIDE FOR DRYING VEGETABLES

Vegetable	Best for drying	How to prepare	Test for dryness (Cool a piece before testing)
Artichokes	Use only tender hearts	Cut hearts into 1/2 slices. To blanch, heat in boiling water for 10 cups water and 1 tablespoon lemon juice for 4-8 minutes, depending on size.	Brittle
Asparagus	Use only tender tips	Wash thoroughly and leave large tips. Blanch (as directed on page 113), with steam 4-5 minutes or in water 30-40 minutes.	Leathery to brittle
Beans	Use only tender stringless varieties	Wash thoroughly. Cut in short pieces or lengthwise. Blanch (as directed on page 113), with steam for 70-80 minutes or in water 2 minutes.	Very dry, brittle
Beets	Use only small, tender beets	Cook as usual, then cool, peel, and cut into shopping strips 1/4" thick. No further blanching required.	Tough, leathery
Broccoli	Use young, fresh stalks	Trim and cut as for serving. Wash thoroughly. Quarter stalks lengthwise. Blanch (as directed on page 113), with steam 5 minutes or in water 4-6 minutes.	Brittle
Brussels sprouts	Use small, tight, fresh sprouts	Cut in half lengthwise through stem. Blanch (as directed on page 113), with steam 6-7 minutes or in water 4-5 minutes.	Very dry to brittle
Cabbage	Copenhagen, Marston, Danish Ball Head, Queen Anne, Savoy, Winesap/Groed	Remove outer leaves, then quarter and core. Cut into strips 1/4" thick. Blanch (as directed on page 113), with steam for 2 1/2-3 minutes or in water for 10-12 minutes.	Tough to brittle
Carrots	Danvers Half Long, Imperator, Blaise, Blushing, Nantes (Chantenay not recommended). Use only crisp, tender carrots.	Wash thoroughly. Cut off roots and tops. Peel if desired; cut in slices or strips 1/4" thick. Blanch (as directed on page 113), with steam for 5-7 minutes or in water 5-8 minutes.	Tough, leathery
Cauliflower		Break into small florets. Blanch (as directed on page 113), with steam for 4-5 minutes or in water for 3-4 minutes.	Tough to brittle
Celery	Both leaves and stalks may be dried	Trim stalks. Wash stalks and leaves thoroughly. Chop stalks into 1/2" pieces. Blanch (as directed on page 113), with steam for 3-4 minutes or in water for 2-3 minutes.	Brittle
Corn on the cob	Stovells Evergreen, Country Gentlemen, Golden Bantam. Ears should be young, tender, and in peak stage.	Wash, trim, blanch with steam until tender, does not double leaf length when cut. Soak 5-8 minutes, or in water 4-5 minutes.	Dry, brittle
Corn, cut	Use same varieties	Prepare same as corn-on-the-cob, except cut corn from cobs after blanching.	
Eggplant		Wash, trim, cut into 1/2" slices. Blanch (as directed on page 113), with steam for 4 minutes or in water 3 minutes.	Brittle

CHU 67

SAWDUST-WAX INCENDIARY

An incendiary, more effective than napalm for the destruction of heavy wood timbers and other hard to ignite combustibles, can be made from a mixture of sawdust and wax. Once ignited, this incendiary mixture burns vigorously because of the hot flame generated by the burning paraffin and the sustained heat generated by the sawdust which acts like charcoal to increase the destructive effect.

MATERIAL REQUIRED:

Paraffin (candle wax, beeswax, etc.)

Sawdust

Heating pot with a two liter capacity

Spoon or stick for stirring

Paper bags or other type of container for storage

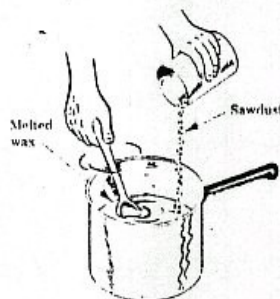

SOURCES:

Drug and hardware stores

PROCEDURE:

1. Put enough paraffin or other wax in the pot so that it is about half full.
2. Heat the pot on a stove or hot plate until the wax melts.

3. After the wax melts, remove the pot from the heat source and add sawdust to the melted wax until the pot is nearly full. Stir the mixture until the wax has cooled enough to become solid again.

4. Transfer the sawdust/wax mixture to a can or jar, or store it in a paper bag or box. The mixture can be stored for months without losing its effectiveness, unless it gets wet. When it dries, it will again be effective.

L'OUVERTURE

A. is thought-provoking
B. is intriguing
C. gives you an intellectual buzz without that bitter aftertaste!
D. ALL OF THE ABOVE!!!

Find out about the best new thing to put in your head:

L'Ouverture

The Black Marketplace of Ideas

P.O. Box 8565

Atlanta, GA 30306

404/572-9141

louveatl@aol.com

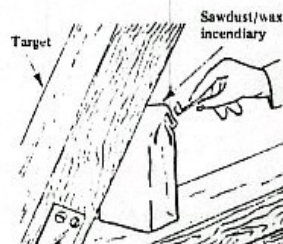

cash, check, or money order

to: L'Ouverture

\$2/issue
\$10/6 issues
(\$20 outside N. America)

HOW TO USE:

1. An easy, effective way to use this mixture is to place a quantity of about a liter into a paper bag and lay the paper bag on the target material to be burned. A match may be used to ignite the edge of the bag which will ignite the sawdust/wax mixture. The fire starts very slowly so there is no hazard involved. It usually takes two or three minutes before the incendiary is burning strongly. This, of course, is a disadvantage where a hot fire is required quickly, in which case sawdust/potassium nitrate incendiary should be used.

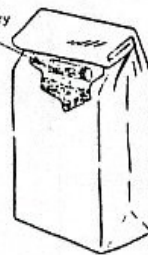

2. Once started, this incendiary burns vigorously. Cold and windy weather have little effect on the way the incendiary burns except that in windy weather it may burn more vigorously.

3. To be most effective on wooden structures, this mixture should be in a pile, never spread it out in a thin layer. Place it under the object to be burned if possible, so the flames will naturally convect upward. Where very large wooden beams or structures are to be burned, use more of the mixture. A bag containing two or more liters will be enough to destroy almost any target.

4. To achieve a time delay, fill a small vial with a tight fitting lid 1/3 full of concentrated sulfuric acid and screw the lid on tightly. Just before use, add several capsules H to the vial. Replace the lid, again screwing it on tightly, and place the vial inside the paper bag on top of the incendiary mixture.

Time delay igniter on top of incendiary

NOTE: If glycerin (available from drug stores) is mixed in varying proportions with the sulfuric acid before it is added to the vial, substantially longer time delays can be achieved. A standard gelatin capsule will dissolve in concentrated sulfuric acid in approximately 20 minutes. A mixture of sulfuric acid and glycerin can prolong the delay time to several hours, and even several days' delay can be achieved with the proper mixture.

URBAN WARFARE DEPT.

The Power of The Crossbow

**CRIMINAL CONTROL
NOT
GUN CONTROL**

The crossbow has been the silent weapon of death for 1,000 years. Even though most crossbow owners today are competition shooters the silent quality of it makes it a defense device worth considering. If you decide to get into crossbows make it's a full length rifle type with at least a pull of at least 100 lbs. and stick with quality brands such as Barnett, Horton, or PSE (Precision Shooting Equipment). Stay away from the pistol type crossbows as they are very underpowered and many are just toys. While some pistol crossbow can cause some pretty nasty injuries shocking to a sane person, but a sociopath on a load of drugs would probably just get pissed off.

Learning to shoot a crossbow correctly requires much practice preferably done safely away from lots of people. Before practicing always check your sights, the bowstring for looseness, and your shafts for bends. A defect in either will affect accuracy, plus replacing this shit is expensive so check 'em!! When shooting aluminum or graphite shafts are the best to be used because of their strength. During practice field points work well, however when using the crossbow for defense broadhead arrowpoints should be used. Besides the fact that broadheads are razor sharp they can be coated with poison as well. A good accessory is a scope with 4x magnification and range adjustable as this will greatly improve accuracy.

Skeleton stock Horton Stag weighs less than six pounds, drills targets at over 100 yards with sizzling power.

Long-flowing laminated glass and space-age composite limbs launch arrows at speeds usually reserved for thousand dollar bows. 150lb draw weight cocks fast and easy. Nail bulls-eyes at up to 150 yards. Increased vane clearance and reduced string tension multiply accuracy. Dust, rain, temperature, and shock proof construction, guaranteed to outlast you. Measures app. 32" x 33", with quick take-down for transport to hunting or range competitions.

- Horton Stag Power Bow #CB-010 \$238.95
- Extra Bow String/Cable for Stag or Horizon #ST-104 \$13.95.

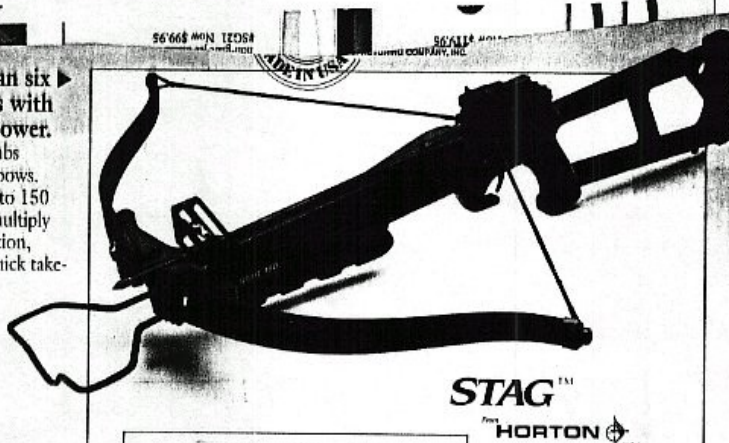

Scopes and electronic point sight on page 4. Laser-sights, page 58!

And even better, no one knows you're carrying it! Hides a number of grips. Large finger cut-outs give you complete control in to carry, and safe to hold. From cleaning mirror finish, to sculpted grip edges, it's a sight to behold.

New Viper rifle-crossbow rips a bolt through five centuries of time.

The Original Bowmen

The year 1400 a.d. Hunting and battle were revolutionized by the appearance of the crossbow. Castles were conquered, kings captured, and countries laid to siege. The combination of archery and machinery was a powerful sight to behold, and a quantum leap in technology. The new Viper inherits all that and more. Pull back and cock the 150lb. action. Adjust the sights for wind and elevation. Detach the safety, and fire! The 16" bolt streaks over 250 feet per second, with staggering accuracy. Try it! Aluminum alloy frame is trimmed with genuine cross-checked hardwood. Glass fiber limbs detach for remote transport. Measures app. 30" x 26". Have fun or hunt with the power of the Viper - direct from the dark ages.

- Viper 150lb. Draw Rifle Crossbow #1566 \$129.95 includes 2 bolts/arrows.
- Extra set of 16" threaded steel-tip alum. bolts, 6-pack #H502-6 \$12.95
- Extra Triple-Twist Nyllex Bow String, cable wrapped #H502-ST \$3.95
- Three Place Bolt Quiver, mounts to frame of crossbow #H502-Q \$4.95

HEAVY HARDWARE: Arsenal of weapons found in home of Woodmere man is shown off by Nassau cops. Haul included two pipe bombs. HOWARD SMITH

High-caliber arrest

By **LARRY SUTTON**

Daily News Staff Writer

A Long Island man concealed a small arsenal in his quiet suburban home, Nassau County police said yesterday.

Authorities found a modified 9-mm. semi-automatic, two 6-inch pipe bombs, five handguns, four shotguns, 11 rifles, several daggers and snuff guns, a blowgun and a night vision scope in Daniel Trachman's two-story, gray-shingled home on Knola Road in Woodmere.

Trachman, 39, told police he needed the weapons for self-defense. He did not elaborate.

Police believe Trachman — described by neighbors as a quiet man who lived by himself — may have been running an illegal gun export business.

"The presumption is, because of the quantity of weapons he had, that they were available for sale," said Lt. Robert Cuerbo.

Trachman identified himself as an auto parts importer-exporter and has cooperated

"He has only indicated to us at this juncture that he needed these things for self-defense," Cuerbo said.

Police were called to the upper-middle-class neighborhood at 2:30 p.m. Sunday when a neighbor reported hearing shots.

Trachman admitted firing a starter's pistol in his backyard, Cuerbo said. Police looking beyond his doorway saw several other weapons and asked to inspect the house.

Besides the weapons, they found 141 boxes, 14 bags and two metal containers of assorted-caliber ammunition.

They also found 3 pounds of black gunpowder and 3 pounds each of the chemicals used to make gunpowder.

Members of the Nassau County police bomb squad removed the weapons and explosive materials.

Trachman was arraigned yesterday on seven counts of criminal possession of a weapon and one count of criminal

WELL HUNG JURY DEPT.

We recently found this article on a BBS, that examines the subject of jury rebellion. Of which you may find interesting.

From the New Jersey Militia Newsletter Dec 1996 vol 2, issue 6

"In the beginning of change, the Patriot is a scarce man, brave, hated and scorned. When his cause succeeds, however, the timid join him, for then it costs nothing to be a patriot." - Mark Twain

Jury Rebellion in California

Under California's "Three Strikes and You're Out" law, if a defendant has two prior felony convictions his third conviction carries an automatic 25 years to life in prison, regardless of how trivial the third offense may be. One well publicized case involved a homeless man who stole a slice of pizza worth about

[0,1,36,40m50 cents, his third offense, he received a 25 year prison sentence. But things may be turning around in California courtrooms. Increasingly, when jurors learn that the defendant has 2 prior convictions, they are more likely to vote for acquittal. The following story comes to us from Tom O'Connell. "When Henry Jackson Jr. heard the court clerk announce in May that he had been found guilty of possessing rock cocaine, he stood up in a rage, filled and

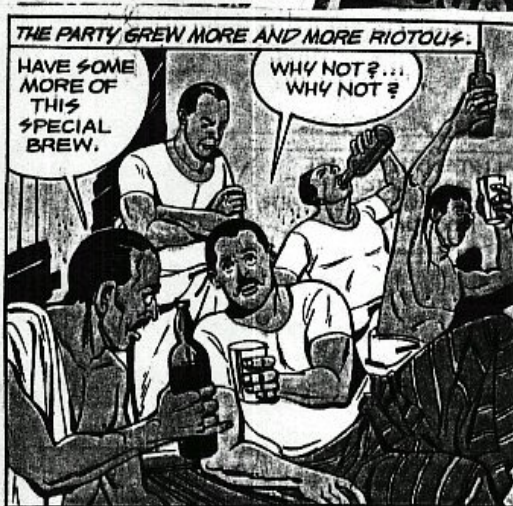

dropped the defense table. "I want you all to know you put me away for 25 years to life!"

"The Los Angeles judge ordered Jackson to be quiet, but he continued his tirade, accusing police of setting him up. "That ain't right!" he yelled as bailiffs dragged him out of the courtroom.

"When the jurors were polled to confirm their verdict, two changed their minds, including the foreman. Over the protests of prosecutors, the trial ended in a hung jury."

O'Connell reported that some jurors "... have been outraged to learn their guilty verdict for criminals caught with a few dollars worth of drugs or a stolen six-pack of beer has meant penalties of 25 years to life behind bars. And in some cases, when jurors have learned of the potential consequences of a hung jury, they have broken down in tears."

[0,1,36,40mtheir verdicts, they have taken the law into their own hands." Jurors have always had the law in their own hands. Unfortunately, few Americans understand the legal, historical and constitutional purpose of a jury. As a juror, you can (and always could) judge the justice of the law as well as the facts of the case. (Jurors have more veto power than the President, Congress and the Supreme Court combined.)

Commenting on this new wave of jury nullification hitting the Golden State, California District Attorneys Association's executive director Lawrence Brown commented: "It really undermines how our criminal justice system is set up." What Mr. Brown really finds upsetting is that judges and district attorneys no longer have complete and unchallenged control over our courtrooms. (and they really are OUR courtrooms.)

When a judge instructs the jury with the words: "You must accept the facts of the case as I give them", or, "You must decide the case according to the law", or, "You must obey the law as I give it to you", this is the biggest judicial con-job ever perpetrated on the American people! The judge has no such authority to instruct a jury in this manner. To do so in fact is a felony; Jury Tampering! If you should ever find yourself sitting in a courtroom as a juror (or a defendant) challenge the judge to show you in writing where he received such authority. It will be fun to watch his face turn red when he realizes he's

been caught! He will not be able to produce any such written legislation. [0,1,37,40m Press <ENTER> For More <S>top <N>on Stop

[0,1,36,40mstatute, code or law because absolutely none exists! Judges do not have, and never have had any such authority to instruct jurors in this manner. They have arbitrarily given it to themselves over the years. Positions of power are natural breeding grounds for despotism.

When Jurors realize they can veto any law by voting for acquittal it will accomplish two very important things. First, it will send a message to legis-

lators in Washington, and State capitols, that We the People have rejected their legislation. This will cause legislators to reconsider new arcane legislation in the future. Secondly, failure to convict on certain "laws" will discourage prosecutors from indicting future "violators".

Absolute freedom, as Lysander Spooner accurately described it, is the ability of the people to choose what laws they will live under and what laws they will not. There is no higher form of freedom for a nation than this - anyone, that judge of, and determine authoritatively for the government, what are their own liberties against the government, of course retain all the liberties they wish to enjoy. And this is freedom. At least it is freedom to them, although it may be theoretically imperfect, it, nevertheless, corresponds their highest notions of freedom" - L. Spooner

In dictatorships, despots pick and choose what "freedoms" the people will have and what laws will rule them. There is no opportunity for a jury to veto [0,1,37,40m Press <ENTER> For More <S>top <N>on Stop

[0,1,36,40mthe

verdict. In such cases the government is absolute.

"Any government that is its own judge of, and determine authoritatively for the people, what are its own powers over the people, is an absolute government of course. It has all the powers that it chooses to exercise. There is no other - or at least no more accurate - definition of despotism than this" - L. Spooner

Man is powerless to resist evil if he does not recognize it as such

KITCHEN CHEMISTRY DEPT.

Useful Formulas

LIQUID FIRE EXTINGUISHER- This one is designed for Class A fire ONLY (such as wood, paper, cloth, plastic, or rubber). The materials needed to make it are 2 cups washing soda, 1 cup potassium alum, 3/4 cup borax (sodium borate), 1/4 cup potash (potassium carbonate), 1 1/2 qt. waterglass (sodium metasilicate), and 2 gallons of water. Thoroughly mix washing soda, alum, borax, and potash in a large container. Pour waterglass into a large garden pump sprayer. Slowly pour dry mixture into sprayer. Stir well until dry mixture has dissolved. Add water and blend well.

CAUTION- Potash and waterglass are caustic. Gloves should be worn when handling.

DRY FIRE EXTINGUISHER- This one can be used on Class B fires (such as grease, oil, paint, or gasoline). It's very simple to make just mix thoroughly 2 lbs. baking soda with 6 lbs. fine mason's sand and store them in metal or plastic containers until use.

GUN SOLVENT- This oil can be used on for cleaning the barrels of all standard pistols and rifles. This one is very simple to make as well just mix thoroughly 2 teaspoons banana oil (amyl acetate), 2 teaspoons benzene, and 5 teaspoons motor oil (type SAE 30 is best) in a jar and store until use after a day's shooting.

For those inevitable situations when a little restraint is required... Solid stainless steel cuffs lock... has a "life-sharp" guarantee.

Distrust of Government

"People all over the world are losing faith in the system," claimed *The Washington Post* recently, adding, "Everywhere, government is a dirty word." Commenting on a number of public opinion polls taken in recent years, the paper noted: "From Canada to Japan and points in between, sometimes staggering majorities of citizens are telling polltakers that their country's government can't be trusted, that their nation's economy is on the rocks and that things will only get worse, not better." In France, for example, some 60 percent of those polled expected things to get worse in the future, while nearly the same proportion expressed dissatisfaction with the way the country is governed. In Italy about 75 percent felt that the State was not functioning as well as it was five or ten years ago. In Canada more than half felt that the next generation would be in even worse economic condition than their own.

It was once said that God didn't make men equal. Smith & Wesson did. In 1855 Smith & Wesson began making the revolvers that armed lawmen from coast to coast. They now add to that tradition. Smith & Wesson Knives. Each handcrafted with Keaton grips - non-slip, non-conducting.

SOLAR BATTERY CHARGER

This is a very useful method of saving enormous amounts of money on batteries plus you need not always be near an electric outlet. It uses 11 solar cells which can be housed in any sort of case with a clear or open top. The diode is to protect the battery from overcharge. All of these are wired in series according to the diagram below, into a battery clip designed to hold the size of the battery being charged. Any of which can be a Nickel-Cadmium of AAA size to D size up to 6 volts.

B1 - Rechargeable Battery up to 6 volts

D1 - 2 amp. 50 PIV diode

PC1-11 - 0.3 amp, 0.55 v DC Solar Cell (Radio Shack part number 276-124)

STRAIVING MARVIN DEPT.

SIMPLE RECIPES

1-800-727-0087

TULBAI- This is a fermented corn liquor which originated from the southwest Indians. The ingredients needed to make a 3 1/2 gallon batch is 7 1/2 lbs. raw masa (this can be purchased from a Mexican deli or made by grinding hominy into mush), 10 1/2 qt. warm water, 1 lb. 10 oz. pinocillo (brown sugar cones, brown sugar can be substituted for this). To make first, heat some water to boiling and pour over piloncillo cones until they're dissolved. Then add the rest of water and masa and stir. Afterwards, place the mixture in a large jar and cover it with cheesecloth. The mixture will be ready in four days, on which it must be consumed as it begins to deteriorate afterwards.

ZUNI TRAVELING FOOD- This is nothing more than a dry mixture of corn flour, dried meat meal, chili powder, and salt. When the traveler got hungry he simply mixed one teaspoon of this stuff for every pint of water and drank the mix. It was said to be good and filling.

DRIED BEEF- Trim fat and slice lean beef into 1/4 " strips. Bring to boil a solution of 2 cups water, 1/2 cup salt, 1/2 teaspoon pepper, 1/4 cup vinegar. Boil meat in solution for five minutes. Press out juices after removing with rollingpins. Place strips on oven racks, set oven for 150 degrees, leave oven slightly open, and dry for 1 1/2 hours.

PENMMICAN- Place dried beef in blender 15 minutes. While beef is in blender take pure kidney fat and slice off membranes. Break up fat and melt in spot over low heat. Strain fat through a strainer and retain strained out oil. This is called suet. For every cup of dried beef add 2 teaspoons sugar and 2 teaspoon chopped raisins. Heat up 1/3 cup suet for every cup of beef and mix thoroughly with dry ingredients to form penmmican. Allow to cool then store until eaten.

FAST SHAKE RECIPE- Mix 1 box of instant pudding, 1 cup powdered milk, and 4 cups water thoroughly, cool if desired, and drink.

HOMEMADE GRANOLA

This nourishing and popular snack can also double as a quick breakfast. Try a little apple juice poured over it.

- 4 cups quick rolled oats
- 1 (8-ounce) can salted peanuts
- 1 (8-ounce) package pitted dates, cut into small pieces
- 1/4 cup sesame seed
- 1/4 cup wheat germ
- 1/4 cup nonfat dry milk
- 1/4 teaspoon cinnamon
- 1/4 cup vegetable oil
- 1/4 cup honey

In a large bowl combine the oats, peanuts, dates, sesame seed, wheat germ, milk powder and cinnamon and mix well. In another bowl, combine the honey and oil, then drizzle over the dry mixture. Stir to mix well. Spread on a 13x9x2-inch pan and bake in a 300°F. oven for 35 minutes, or until golden, stirring frequently. Cool in the pan.

Makes about 7 cups

For Traveling: Prepare granola in advance and store in plastic bags. Will hold indefinitely in airtight packages.

HEY WHAT'S UP DOPE DEPT.

The Connection Between Cartoons And Drug Use

Sometimes when I go to my sister's house I find myself wasting significant hours watching cable TV in particular the cartoon network. I like it because it shows many of the "goldie oldies" I used to watch when I was a kid. However, a little while ago I started noticing how many of the cartoon characters would act like many of my friends when they were fucked up of the central drug. Then I really started watching them and realized how many of them did act they were on drugs. This probably explains partially why this cuntry has supposedly a drug use "problem." Look at where every kid gets his first role model at!

Here's the lowdown on what I believe each of my favorite characters are on. Well, let's see that badass Tazmainian Devil is obviously a crackhead with the way he's always running around with no sense of direction. Since he's also always seems to be hungry he has probably been smoking "woolies" (that's crack mixed with pot). Porky the pig is so stupid, always being clumsy, and stuttering so I think he sniffed too many bags of glue, gasoline, or some other brain killing inhailant. Ren and Stimpy have some sort of acid connection. The weird thing is I don't think the characters are tripping but I do think the artist's who drew them are!! Droopy from Tom and Jerry with the slurring "Hi, my name's Droopy" plus with those nodding eyes definitely seems to be high on heroin. The 'toon network has a show called "Down wit Droopy D". The D ain't for nothing I bet! Elmer Fudd's a good old drunk as most hunters are. The Roadrunner is one hellious of a crystal meth or ice fiend - for obvious reasons. Maybe Wil E. Coyote giving him the wrong kind of bird seed or something which explains why the poor bastard can never catch Roadrunner. Daffy Duck I can't quite figure out- I mean does he pop amphèthamines, freebase coke, or maybe tweek on cheap speed. Hmm... he probably fucking does all three at once for Goddess' sakes!! The Smurfs with that "La La La La La" singing shit and living in mushrooms are potheads beyond a doubt- fucking hippies! Popeye the Sailor Man always boasts about eating his spanich but he's skin popping steroids definitely. Scooby Doo and Shaggy took one sheet too many always being so paranoid and seeing ghosts all the time. The Decepticons from Transformers do the angel dust thing- for obvious reasons. Bug's Bunny another weird one to figure but he's probably on tranquilizers or Prozac. The Flintstones seem to be the only staright ones I can think of, probably because they're supposed to be living at a time before drugs were invented. And as for those animaniatics only hell knows probably some halluncinogen the CIA cooked like BZ or something.

MICROWAVE BRAIN FRYER

The microwave brain fryer is basically a microwave oven with its door safety device disabled, making it an possibly effective harassment or execution device. All microwaves are capable of doing extreme harm to living tissue due by heating the water present in those tissues (ever heard about the shit the brains who try to dry off his soaking wet dog in a microwave- guess what happened to the dog?). Anyhow, all properly functioning microwave ovens have a safety device cuts power to the oven the instant the door is opened. The device consists of two to five interlocks and monitor switch. Interlock switches disable the oven until the door is closed. They are usually located in the door or door handle, however some models are exceptions. The monitor switch blows a fuse inside the oven should the interlocks fail. The construction method shown below for the brain fryer is theory only, never been tested by us, and is for educational purpose only. But the idea was so sick, we had to include it in!

MATERIALS- One high power microwave oven (the higher the better but at least 1000 watts), schematic for the oven model you're working on (go to a appliance repair shop for it), screwdriver, electrical tape, soldering iron.

CONSTRUCTION-

WARNING- When opening any microwave, discharge the high voltage (HV) capacitor by applying 2 screwdriver blades to it. This step is NOT to be taken lightly!! These capacitors can carry a charge up to 4000 Volts+ and can shock or kill if when the oven is off.

- 1) Making sure oven is unplugged (common sense- eh?), open the cover with a screwdriver.
- 2) Discharge the HV capacitor.
- 3) Using the schematic for the oven locate the interlock and monitor switches.

know

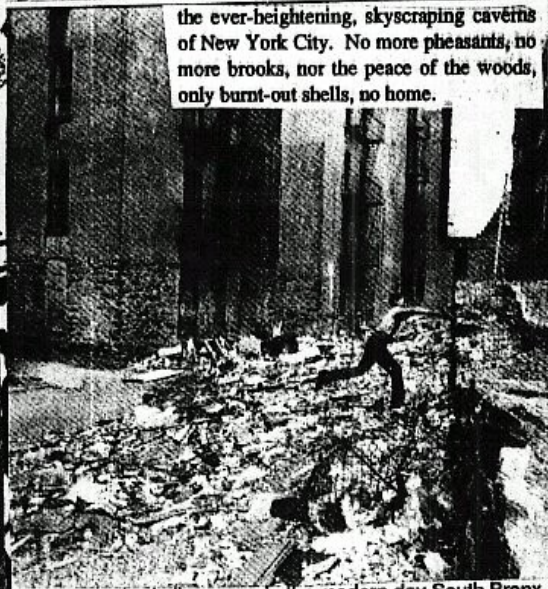

- 4) Using wire cutters snip the wires running into interlock and monitor switches.
- 5) Using soldering iron and electrical tape rewire the broken connections according to the schematic but without including the switches. This will bypass the safety switches.
- 6) Close the cover to the microwave oven.
- 7) Now you have a microwave oven that will operate with the door open and a potentially dangerous weapon.
- 8) When your victim is sleeping or in some other unconscious position, slowly open the oven, place it over their head, turn it up to maximum cook power, and turn on the juice!! An interesting point is that, since there's more water inside the skull than outside, a victim would "cook" from the inside out (heh heh)!!

ADVANCED CULTURE

We're Fighting For Your Life **AMONG THE RUINS**

Rubble heaps and gutted buildings in Cologne, Germany, after an Allied bombing raid during World War II.

A hauntingly similar scene in the modern-day South Bronx.

the ever-heightening, skyscraping caverns of New York City. No more pheasants, no more brooks, nor the peace of the woods, only burnt-out shells, no home.

Make your point at light speed.

SCAVENGING FOR FUN AND PROFIT

"I love trash" the famous battlecry of Oscar the Grouch is also that of the good scavenger as well. Depending upon your area (the more populated and less thifty the better) just about any essential item can be many times be found in the garbage. We have personally pulled out clothes, boots, gourmet food, tapes, records, working radios, appliances, furniture, and even liquor from dumpsters. Scavenging can save you lots of money because why buy something when you can find it. In addition, if you're good at woodworking, mechanics, or electronics you can fix up throwaway furniture, tv's, stereos, and the like and resell them. In most areas you can take old aluminum, brass, or copper and sell it for scrap. If you aren't already scavenging, do it today, you don't know what you're missing out on. The listing below suggests some places to start.

* **THRIFT STORES**- Sometimes you can find clothes that are out- of- season or stuff they get rid off when they're overstocked.

* **COLLEGE CAMPUSES**- College kids are usually so wasteful and pampered that when the semester ends many of them will dispose of perfectly working radio's, appliances, or furniture on the account that "mommy and daddy" will probably just buy them a new one, especially if the item is big and bulky. Take advantage of big private rich colleges where they're dorms and the students drive nice cars for the best shit.

* **WHEN NEIGHBORS MOVE OUT**- Many times the trash will leftovers from yard sales but at times you can find unopened cans of food, kitchen appliances, furniture in fairly good condition, medicine cabinet leftovers. It is best to find a freind with a car and search a neighborhood (the richer the better) for yard sales. Note them and check for when they're moving out.

* **RESTAURANTS**- The old stanby's such as fast food places are becoming harder these days due to an increase of garbage technology (like compactors) but some are still good like Taco Bell and Kentucky Fried Chicken. However- many of these places are anal about scavengers. Some will even threaten to call the police on you. If this happens simply clean up after yourself, walk away a few minutes, and come back. Pizzeria's are usually still good for getting unwanted pizzas or fucked up ones. Also good places for free food are convenience stores like 7-11 and Conoco.

* **CONSTRUCTION SITES**- These are excellent places to find materials such as lumber, windows, doors, and bricks. It's best to go there at night when noone woking. A word of warning some sites may have a night watchman on duty.

19

* COURTHOUSES- This one is unique probably but several months ago it was reported in Manhattan that some suspects going to court stashed weapons (including guns) in trash cans outside the courthouse because of metal detectors. Some homeless people started discovering "free" knives and guns in the trash. Then the court officers caught on and most suspects I think stopped this practice. However, this may not be true in other cities. So if one is bored, got plenty of time, and feeling lucky about getting a free weapon- check that trash. A word of warning- guns stashed away may be "dirty" (used in crimes).

Explosives

Dr. Demolition calls this explosive his 35mm Killer. Here is what you need:

- 1 lb. of potassium chlorate
- ¾ cup of 350 mesh (fine) aluminum powder
- 1 cup Hercules Blue Dot coarse gunpowder
- ⅓" rocket fuse
- 15 empty 35mm film containers
- 1 mortar and pestle for mixing

Here's what you do: Mix them all together using a mortar and pestle or plastic tray — anything not likely to create a spark. Also, do not allow any aluminum dust to get into the air; that stuff is dangerous.

After thoroughly mixing, use a small plastic spoon to fill the film cans. Fill fully, then tamp tightly with the ceramic pestle. Cut six inches of fuse for each bomb, prick a tiny hole in the film can lid to feed the fuse through. Before you screw on the lids, be sure you seal the threads with a super-glue. Also seal the fuse hole.

You are now ready for destruction. Dr. Demolition says that each one sounds like two M-80s going off together. Note: These are *not* waterproof, but they are very dangerous!

GETTING ONE'S ADDRESS FROM A P.O. BOX MADE EASY

Most people when they get a Post Office Box believe that the address of the post office box is confidential information and thus protected against snoops. This is true in most cases when a post office box is opened for personal uses NOT business uses (somehow the U.S. Postal Service thinks this thwarts mail fraud) but our research has found a little loophole to this confidentiality rule. Under postal regulations if you attempting to skip out on court, jump bail, or have a supeona against you the post office MUST release the address of the box holder. Below is a form letter which can be used by anyone desiring the address of a boxholder. A little hint the post office doesn't usually check if the boxholder actually has a court action against them (especially in big cities).

Name and box number of person
with P.O. Box

Dear Postmaster,

Under U.S. Postal Regulations, to wit; Administrative Support Manual Section 352.44e (2), you are authorized to release the address of an individual using a P.O. Box, as an address to avoid legal process service. Please send us the address of the above captioned person.

Very truly yours,

Your Name and address

Another hint is using stationary with a Legal Process Service or Attorney letterhead adds legitamatcy to the letter (see our komputer section in the issue for more info on letterheads).

EVEN THE LION
MUST DEFEND HIMSELF

Click the switch and fire staggering blasts of paralyzing CN/CS Tear Gas - as fast as you can pull the trigger. Designed for police riot control, ballistic Halon propelled gas leaps 20 feet. Thugs crawl away blind and gasping. Or, hold the trigger down for full-auto and jolt out an alley-sweeping 5-foot wide choking fog - crippling even multiple assailants. 150 gram, 45mm Thunder Cartridges speed-load in 10 seconds. Rigged ABS construction and luger design meets all law enforcement specifications. Measures app. 8 x 5" for car, home, or holster carry. Check your local laws before ordering.

World War Web Dept.

SURFING FOR THE SURVIVALIST

The use of komputers in the world, for better or for worse, is becoming increasingly pervasive in the world today. We for a long time have had very mixed feelings about komputers. Actually in the past we wished that a virus would spread worldwide and make all the networks crash! However, we've come to the realization that this technology is, 1) here to stay and 2) like any other tool is not inherently evil in itself but like fire can be your friend or foe depending on its use. The survivalist should, in light of this try to become for his/ her own purposes, such as collecting information as well communicating with others of like mind.

Almost anyone these days has access to some sort of komputer. Most libraries have them for use by the general public. Some universities may occasionally let outsiders use theirs but this is rare (to get around this dress like a student and see the section on scanning ID's). You may also be lucky enough to have a relative or good friend that may let you use theirs (we have this arrangement).

If you're considering buying your own komputer, be sure you do some research and shop around. You might could buy one used and save a significant amount of money provided you check it out first. Their are two types of komputers in common use today- PC's and MAC's. We suggest you get a PC as there's more software available for it. Also get at least the following hardware- a 15" monitor, a 3.5 floppy disk drive, a hard disk drive, a 14.4 bps modem, and a printer. As far as microprocessors, memory, and operating systems are concerned; you can get by with a 486dx microprocessor, 4 megabytes (MB), and Windows 3.1. However, you should try to a Pentium microprocessor, 8 MB of memory, and Windows 95. Other hardware such as an audio card, speakers, CD-ROM drive, or scanner for multimedia capability can be added as well.

The four most important programs a survivalist should try to familiarize him/ herself with is a word processor, communications, data encryption, and a good utilities program with anti-virus capability. Others may be useful like a spreadsheet if you have a business and want to cook the books so the IRS doesn't tax you to death.

Most of us are familiar with word processors which is basically a hi-tech typewriter. Many word processors offer the ability to use multiple letterfaces (also known as fonts) and creating professional looking letterheads. The feature alone would probably make ordering certain items for certain items from companies a lot easier and less suspicious looking, especially those that claim to not sell to individuals but to law enforcement agencies only or to universities and labs only in the case of chemical companies. If you decide to embark on this sort of scam, title yourself "Purchasing Agent" of your "Company" or "Police Department" to make it sound official. Two popular and affordable word processing packages are Microsoft Word and Corel Worperfect Suite

TRIUMPH OVER FASCISM 1945 - 1995

Fifty years ago our fathers, grandfathers, or perhaps even yourself, victoriously fought back the dark tide of terrorism...

Communication software is probably the most important piece of software you can have because it allows your komputer to reach into the outside world. Using this you can send and receive faxes, you and another user can connect to exchange data, and access other komputer systems.

The first type of system is a BBS (bulletin board system). These are usually privately owned and set up by hobbyists. Users can read, post, and reply to messages on specific conferences to exchange information on virtually any topic. Users can also download public domain files such as software, text, or graphics to their own komputers. Most BBS's are general interest but some are special interest related. There are even BBS's devoted to survivalist interests. To become a user of a specific BBS- one needs only to dial by komputer its phone number and follow the instructions given once connected.

The second type are online services such as Amerikan Online or Prodigy which many of you probably heard of. They're mostly devoted to families and business people. I personally find no use for them because they're expensive and contain information I could find in any local library like headline news, magazines, or financial shit- sort of like Top 40 of the modem world. I think they're a waste of money but it may be worth it if you have kids.

The next type are internet providers. They give access to the internet only. Online services give access to the net too but with them you pay by the hour. Whereas, with providers you pay a flat-fee per month for unlimited service. I've seen some as low \$12 per month plus providers don't censor parts of the net. To use the net you'll need browser software which is easy to get as most providers include them when you sign up and many new komputers have them pre-installed.

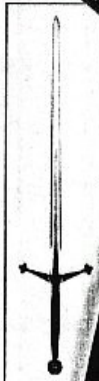

The internet is a neat place to hang out with the two most popular services being websites and newsgroups. Websites are the graphical part of the net and resemble fancy billboards. They are kind of like online magazines put out by universities, businesses, governemnt agencies, or anybody else with a bizzarrie pasttime. Newgroups (also known as Usenet) are dicussion groups where users post messages on various topics. They are almost like BBS's except that messages on a BBS are mostly displayed locally whereas on the newsgroups it's worldwide. There are other services such as IRC (internet relay channel)- which is sort of like a CB radio as you can 'talk' to others online in real time. You'll meet a lot of wingnuts and freaks if you stick around here long enough. If you wnat to download files you can search the FTP (file transfer protocol) sites- if you're lucky you could grab some free software. The net is kool but be careful beacuse like drinking and drugs some people get addicted to this thing!

CYBER

There's a vile, slithering snare of greed winding
through your dome
It's fascist fangs can make you bleed a hydra's
head in every home
With its forked-tongue telepathy television is
your enemy
My job your job his job her job our job their job
is to shut off that shit and turn computers on
Today we're all on disk, us pros and those cons
Worlds of information, facts and lies
Virtual reality can be felt in its eyes

Here I go- like a psychotronic nymph straight
through the media's hype labyrinth
Relaying my dreams to every shore
No longer I am the government's whore
When I'm not in view I can be seen
I'm invisible - Channel 13
I'll never be through and you can best bet
That I'll never die 'cause I'm on the internet

- Keith Moore

LEAD SHIELDED ROOMS FOR COMPUTERS

Data encryption software protects your data such as sensitive records or E-mail (which CAN be read by other people) from being accessed by unauthorized users. It uses a form of cryptography known as DES (Data Encryption Standard) which uses public key/ private key type encryption. This allows you to exchange data with others while still maintaining security. They can send you files but NOT be able to read your other files. Two good encryption programs are Norton "Your Eyes Only" from Symantec and PGP (Pretty Good Privacy).

Besides encryption an absolute MUST have is anti-virus software, especially if you download lots of files or share floppy disks with others. Computer viruses (of which 8,000+ are known to exist) small programs which replicate at will until entire the komputer's inoperable or entire data files are destroyed. A good anti-virus program is Norton Anti-Virus, which scans for thousands known viruses plus you can get updates to protect your komputer from new viruses.

You Know You're Infected When...

With so many viruses in circulation, we've put together a list of ones to watch out for.

Date-Triggered Viruses

- Whatever happened to sending a card? **Michelangelo** activates on March 6, the Renaissance artist's birthday.
- **Frodo** springs into action on September 22, the birthday of J.R.R. Tolkien's Frodo Baggins from the *Lord of the Rings*.
- On the 13th of each month, **Chaos** counts 50 keystrokes, displays a message, and then hangs your computer.

Minor Pests

- Where's the fire? **Ambulance** displays an image of a small emergency vehicle driving across the bottom of your screen.
- The **Yankee Doodle** virus plays the dandy patriotic ditty.
- It's raining characters with **Cascade**, which causes letters and numbers to drop from the top of your screen display.

Major Plagues

- The **WWT-01** virus prevents applications from launching and running.
- **AntiEXE** causes your system to hang.
- Appropriately named, **DoomII.752** deletes valuable data.

- **Internal** broadcasts the message "INTERNAL ERROR 02CH. PLEASE CONTACT YOUR HARDWARE MANUFACTURER IMMEDIATELY!"

- If you boot a **Natas** virus from an infected disk, it triggers about once every 512 times, then it formats all hard disks on your system, taking your data with it.

Macro Viruses

- **Word Macro** virus attacks Microsoft Word's NORMAL.DOT default template (the one globally available to all Word templates on the computer), forcing users to save infected documents as templates. Only templates contain the actual virus code.

- **Concept**, a strain of the **Word Macro** virus (actually a bug in the virus code) displays a dialog box with the number 1 and an OK button in its initial stages.

- **FormatC** attempts to format your C drive if you're running a Windows system.

- A rather green virus, **Nuclear** deletes the c:\COMMAND.COM file on a DOS-based system. It also prints an antinuclear testing message on Word documents.

The Net After Dark: Underground Guide to The Newest & Most Bizarre Hangouts on The Internet, CompuServe, AOL, Delphi, local BBS, & More! by Lamont Wood

NEW!

Meet the real Internet, the one with dark, crooked alleys where dedicated cybernauts gather in groups large and small. That's where things really sizzle. In this 352-page book, author Wood puts readers on the fringe of the Internet, where millions of computer users explore the hippest online hangouts. Learn about UFO research, debate the JFK conspiracy. Find virtual reality software & Monty Python scripts. Ponder the universe, join fan clubs, locate hackers, secret radio frequency exchanges, bootleg software groups, phone phreaks, weird religions, political radicals, people with quirky romantic interests, and hundreds of other types of offbeat, strange, and unusual people and groups. This entertaining book not only tells where to find them, but how to logon to access this dazzling array of completely wild online services. More than that, readers get helpful tips, lingo, and inside information for dealing with the various underground cultures--lest they get flamed by the denizens of cyberspace for being "clueless newbies."

The sword of legend - re-created

THE OTHER TYPE OF SCANNER

Most of us think of a scanner as something we listen to the pigs and other radio users with but for computers a scanner is a device which converts paper documents into digital files that can be saved then altered or uploaded to other computers. These documents can be anything- articles, manuscripts, and even color photographs. Scanners come in two types- handheld and flatbed. Handhelds must be passed over the document manually while flatbeds look like copiers so you only need lay down the original and scan it. Whatever type you use make it's a color NOT a grayscale. If you buy a scanner you'll want to make sure it has OCR (Optical Character Recognition) and photoimaging software. The OCR software "reads" text and while it works best with print, it will at times read even legible handwriting. This combined with photoimaging software it is possible to generate realistic looking alternate identification cards. Some of the more expensive packages can even magnetic strips and make barcodes. However, it is not necessary to buy the one like the type shown below. One could find a place using such equipment and find a way to "borrow" it for a while.

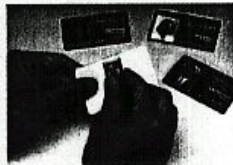

Presenting Tiger Quick Badge I.D. Maker! *New!*

Inexpensive, Easy-To-Make Security I.D. Badges And Labels.

Tiger Quick Badge's ease of use, speed and utilization of an industry standard database makes it the ideal choice for automated ID badge construction. It allows quick, efficient and low cost card production. Tiger Quick Badge is a Windows-based program, providing the look and feel you're accustomed to, the ease of use of a mouse, and a very short learning curve. You don't have to go

through classroom training to construct professional ID badges. You'll get unlimited custom card design capabilities that let you create different layouts for different departments or functions. You can even have multiple photos on one badge! You can quickly change company names, logos, and graphics on your ID cards. Order today and receive an outstanding Tiger Special!

- Create a complete badge database
- Print barcode badges for easy scanning
- Powerful badge design tools
- Print to any Windows printer
- WYSIWYG operation

Quick Badge Polaroid Bundle!

FREE! Polaroid PhotoPad Scanner!

Receive a FREE PhotoPad and Camera With The Purchase Of Tiger Quick Badge, A \$299.99 Value!

Our second bundle combines Quick Badge with the amazing Polaroid PhotoPad... Nothing's easier...or more advanced. Polaroid's first scanner designed for home and business use, PhotoPad offers consumers advanced image science in an easy-to-use format. The PhotoPad scans color and black/white photos up to 4 x 6 in size, in both 35mm and Polaroid format. PhotoPad is compatible with Windows 3.1 and Windows 95. Speed and ease of use characterize PhotoPad's hardware and software. Its plug-and-play design offers initial set-up in five minutes or less; scanning is a one-step operation and consumers using a 486 PC can expect to complete a typical scan in 60 seconds or less!

PhotoPad offers a variety of key features that allow the user to manipulate the scanned image. Users can select appropriate color (24 bit color, 256 color or grayscale), Resolution (100-400 dpi), Scene Analysis (auto color correction) and Lightness Slider (to adjust lightness or darkness of photo). A cropping tool allows the user to crop image area. Includes: filter interpolation (to remove color fringing), automatic color/contrast, automatic color matching and calibration (to remove visual noise and dust streaks). On-line help provides useful user information for simplicity and ease.

HERE'S WHAT YOU GET:		Value
Quick Badge Software	...	\$999.99

Hey! Nice Job!

Take a whack with the best under \$30 action-hacker ever made.

CORRODE & DESTROY

Improvised Claymore Mine

By Raymond J. Lerner

Black Powder Squib:

Obtain a 12 volt lamp bulb (with a flange on it [head or tail light bulb]). Carefully break the glass off of the bulb. Solder wire leads to the rear and the side of the bulb. You can check the filament by very quickly attaching the wire leads to a 12 volt battery. Glue the bulb into the rear of the claymore casing with the flange inside the case and the wire leads out the back. Make a paper cylinder that is large enough and long enough to protect the filament of the bulb. Glue this cylinder to the inside of the casing so that it protects the filament.

Casing:

This can be made of almost anything, but 1/8 inch thick plexiglass is one of the easiest materials to work with. Make a small box that is 3 inches wide by 6 inches long by 1 inch deep. You need 4 sides and a bottom but no top. Use solvent type glue to put the box together.

Note: the box can be made any size. The larger it is the more damage you can do with it but also the more explosive it will take to fill it.

Drill a hole in the middle of the bottom of the casing large enough to put the base of the light bulb thru. Install the black powder squib in the casing as shown in the drawings.

Casting:

Make a mold with an outside length and width slightly less than the inside dimensions of the casing. This should be approx. 1 inch deep. This mold can be made with body putty or with plaster of paris. Let it cure and then use spray paint to coat the inside of it until the mold is smooth to the touch.

To Cast:

Spray the inside of the mold with a casting release agent. Mix and pour liquid casting plastic into the mold until it is approx. 1/4 inch deep. Now pour in 3/16" or 1/4" steel ball bearings until you have a layer of them covering the bottom of the mold. Add casting plastic if needed so that the layer of balls is barely covered. Set the mold aside and let the plastic cure. NOTE: Plaster of Paris or body putty can also be used to cast the balls in. The ball bearings are the easiest to work with but any metal can be used (nuts, bolts, screws, nails, etc.).

When the casting has cured, remove it from the mold. Use alcohol to remove the wax residue from the casting.

Now carefully pour black powder into the paper cylinder that protects the filament of the bulb in the casing. Lightly shake the casing to settle and pack the black powder around the filament. Now fill the rest of the casing with black powder until you have a level layer of black powder slightly above the top of the paper cylinder.

Place the casting inside the casing on top of the layer of black powder. Now use a silicone or plastic sealing compound to seal around the 4 edges of the casting. Once it dries your claymore mine is ready to be used. NOTE: for concealment use colored plexiglass or paint the claymore after you've put it together.

Emplacement:

To place the claymore, tape it to a tree, pole or what ever is handy. Make sure the ball bearings point toward the enemy. Remember that this type of weapon produces a mean back blast so make sure you are under cover when you set it off.

You can make up a control board to control a number of claymores that you have in place. Or you can simply string wires from each of your mines to a central location

and touch the ends of the wires to the poles of a 12 volt battery. NOTE: This weapon can be made more effective (cover a larger area) by making the casing and the casting slightly curved.

THIS WEAPON CAN ALSO BE MADE USING THE EXPLOSIVE AND FUSE BELOW.

Explosive:

Mix three (3) parts Potassium chlorate and one (1) part granulated sugar. Confine in a container (in this case the claymore mine) and use time fuse to set it off.

Time Fuse:

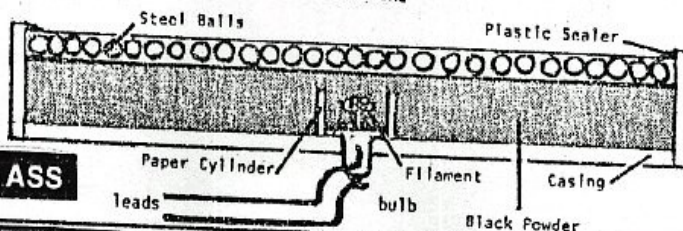

Boil equal parts of potassium chlorate and granulated sugar in water. Dip cotton string in the solution and let dry. Burning rate is approx. sixty (60) seconds per foot. Test some to make sure!

This weapon can also be used on the side of a truck or tractor. This was done in Vietnam and was found to be highly effective in ambush situations where the enemy was at close quarters to the vehicle being attacked.

Make a steel box approx. 6" deep and 12 by 12" on the sides. Just sides & bottom, no top. Solidly attach the box to the side of a vehicle with bolts or weld it in place. Make sure it is attached to something solid - remember that back blast! Make up 2 sand bags, one 6 x 12 and the other about 10 x 12. Set the small bag in the bottom of the box and the larger bag into the back of the box. (The open end of the box should point outwards from the vehicle). Now set the claymore into the box so that it is sitting on top of the small bag and against the large bag. Securely fasten the mine into the box with wire or what ever is handy so it won't fall out as you drive down the road.

A switch set into the dash is the easiest way to set this placement off. Wire a lead from the battery thru a breaker or a fuse to the switches and them to the claymores.

NUKE THEIR ASS

SEEK AND EMPLOY DEPT.

SURVIVAL SOURCE LIST

SAFE TREK OUTFITTERS- 90 SAFE TREK PLACE, BOZEMAN, MT 59715. 800-424-7870- For one phone call these guys will send you a nice slick 70 page catalog of 'provisions for perilous times' (so they say). Besides the books and med supplies- the best part is the wide bulk food selection some priced well for budget minded survivalists. Plus they include an article of the coming global food shortage and famine.

Want to get even w/someone?

Try this site:
<http://www.digicrime.com/>

CHEAPER THAN DIRT, 2536 NE LOOP 820, FORT WORTH, TX 76106

This fat catalog is littered with parts and accessories for firearms (such as firing pins and stocks), ammo, knives, binoculars, reloading presses, scopes, and patches from kool kompanies like Heckler and Koch, Colt, etc. all sold at discount prices. A must for any arms hobbyist!

PYROTEK, P.O. BOX 1, CATASAUQUA, PA 18032

For \$2 you get a huge catalog for lab equipment, glassware, chemicals, and instrutional videos. They sell chemicals some of which can be used to make 'questionable' substances (hint.. hint..)!

SPORTMAN'S GUIDE- 411 FARWELL DRIVE, PO BOX 239, ST. PAUL, MN 55075-0239

Military surplus and commercial gear at bargain basement prices. Merchandise includes hunting clothes, boots, power tools, t-shirts, ammo by the case, paintball, elcetronics, truck and ATV accessories, and even those 400 watt car speakers that the gangstas love to blast.

GALAXY ELECTRONICS- 5300 21st AV., BROOKLYN, NY 11204

A wholesaler for peddler goods. The shit in this place is dirt cheap- imagine new stunguns for \$20, 24 batteries for \$2.40, flashlights for \$12/ dozen. They sell about everything radios, cameras, toys, hardware, car stereos, cameras, "novelty" items, etc. I think most of it were castoffs from promotional goods warehouses. The only drawback is you must order at least \$65 worth of shit to deal with them.

CRB RESEARCH- BOX 56, COMMACK, NY 11725

They sell books mostly on scanner frequencies and modification, but they have other interesting books on the internet underground, cell phones, bounty hunting, CB, shortwave, scams; plus communication accessories and an assortment of phony badges.

THE EDGE COMPANY- P.O. Box 826, Brattleboro, VT 05302

A James Bond catalog for yuppies. Nice stuff in here like revenge kits, bug detectors, survival torches, a lockpick that looks like a credit card, crossbows, gladiator looking knives, shock batons, and much more. Even if you can't afford their ridiculous prices it's still fun to look at.

ALL HUMYN THINGS ARE SUBJECT TO DECAY.

BILL OF PLIGHTS DEPT.

I'm sure you've all heard of FEMA (Federal Emergency Management Agency) probably when an area has been hit by a natural disaster (hurricane, flood, earthquake, etc.). However, this agency does more than just handout cots and blankets to displaced families. It's a catalyst for declaring martial law during a 'national emergency' as this BBS posting explains in greater detail.

Date: 10-28-96 (11:51) Number: 12053 of 12100 (Refer: NONE)
To: ALL
From: RAY NORMANDEAU
Subj: FEMA: all you want to know
Read: (N/A) Status: PUBLIC MESSAGE (Echo)
Conf: NEWSWIRE (5) Read Type: GENERAL (11)

Subject: FEMA-The Secret Government

EXCERPTS from FEMA - THE SECRET GOVERNMENT
By Harry V. Martin with research assistance from David Cail
Copyright FreeAmerica and Harry V. Martin, 1995

This government organization has more power than the President of the United States or the Congress, it has the power to suspend laws, move entire populations, arrest and detain citizens without a warrant and hold them without trial, it can seize property, food supplies, transportation systems, and can suspend the Constitution.

THE MOST POWERFUL ORGANIZATION IN THE UNITED STATES

Though it may be the most powerful organization in the United States, few people know it even exists. But it has crept into our private lives. Even mortgage papers contain FEMA's name in small print if the property in FEMA was created in a series of Executive Orders. A Presidential Executive Order, whether Constitutional or not, becomes law simply by its publication in the Federal Registry. Congress is by-passed. Executive Order Number 12148 created the Federal Emergency Management Agency that is to interface with the Department of Defense for civil defense planning and funding. An "emergency czar" was appointed.

FEMA has only spent about 6 percent of its budget on national emergencies. The bulk of their funding has been used for the construction of secret underground facilities to assure continuity of government in case of a major emergency, foreign or domestic. Executive Order Number 12656 appointed the National Security Council as the principal body that should consider emergency powers. This allows the government to increase domestic intelligence and surveillance of U.S. citizens.

Here are just a few Executive Orders associated with FEMA that would suspend the Constitution and the Bill of Rights. These Executive Orders have been in record for nearly 30 years and could be enacted by the stroke of a Presidential pen.

EXECUTIVE ORDER 10990 allows the government to take over all modes of transportation and control of highways and seaports.

EXECUTIVE ORDER 10995 allows the government to seize and control the communication media.

EXECUTIVE ORDER 10997 allows the government to take over all electrical power, gas, petroleum, fuels and minerals.

EXECUTIVE ORDER 10998 allows the government to take over all food resources and farms.

EXECUTIVE ORDER 11000 allows the government to mobilize civilians into work brigades under government supervision.

EXECUTIVE ORDER 11001 allows the government to take over all health, education and welfare functions.

Power Spheres, (Lippert, Clouson & #NDB \$19.95
Power Spheres, (Lippert, Clouson & #NDB \$19.95

LIVER DAMAGE DEPT. II

EXECUTIVE ORDER 11002 designates the Postmaster General to operate a national registration of all persons.

EXECUTIVE ORDER 11003 allows the government to take over all airports and aircraft, including commercial aircraft.

EXECUTIVE ORDER 11004 allows the Housing and Finance Authority to relocate communities, build new housing with public funds, designate areas to be abandoned, and establish new locations for populations.

EXECUTIVE ORDER 11005 allows the government to take over railroads, inland waterways and public storage facilities.

EXECUTIVE ORDER 11051 specifies the responsibility of the Office of Emergency Planning and gives authorization to put all Executive Orders into effect in times of increased international tensions and economic or financial crisis.

EXECUTIVE ORDER 11110 grants authority to the Department of Justice to enforce the plans set out in Executive Orders, to institute industrial support, to establish judicial and legislative liaison, to control all aliens, to operate penal and correctional institutions, and to advise and assist the President.

EXECUTIVE ORDER 11049 assigns emergency preparedness function to federal departments and agencies, consolidating 21 operative Executive Orders issued over a fifteen year period.

EXECUTIVE ORDER 11921 allows the Federal Emergency Preparedness Agency to develop plans to establish control over the mechanisms of production and distribution of energy sources, wages, salaries, credit and the flow of money in U.S. financial institution in any undefined national emergency. It also provides that when a state of emergency is declared by the President, Congress cannot review the action for six months.

The Federal Emergency Management Agency has broad powers in every aspect of the nation. General Frank Salzedo, chief of FEMA's Civil Security Division stated in a 1983 conference that he saw FEMA's role as a "new frontier in the protection of individual and governmental leaders from assassination, and of civil and military installations from sabotage and/or attack, as well as prevention of dissident groups from gaining access to U.S. opinion, or a global audience in times of crisis."

FEMA has developed 300 sophisticated mobile units that are capable of sustaining themselves for a month. The vehicles are located in five areas of the United States. They have tremendous communication systems and each contains a generator that would provide power in 120 homes each, but have never been used for disaster relief.

These Presidential powers have increased with successive Crime Bills, particularly the 1991 and 1993 Crime Bills, which increase the power to suspend the rights guaranteed under the Constitution and to seize property of those suspected of being drug dealers, to individuals who participate in a public protest demonstration. Under emergency plans already in evidence, the power exists to suspend the Constitution and turn over the reins of government to FEMA and appointing military commanders to run state and local governments. FEMA then would have the right to order the detention of anyone whom there is reasonable ground to believe... will engage in, or probably conspire with others to engage in acts of espionage or sabotage. The plan also authorized the establishment of concentration camps for detaining the accused, but no trial.

The crux of the problem is that FEMA has the power to turn the United States into a police state in time of a real crisis or a manufactured crisis.

RECIPE FOR MEAD

Mead used to be a favorite of the ancient Vikings, now with some honey, citric acid, tea, and yeast you can make your own. Mix 4 1/2 lb. honey with a half gallon of hot water. Bring to a boil and boil for two minutes. Into a crock or canister, add 1/4 oz. citric acid and 1/2 cup fresh strong tea. Add boiling water until you have a total of one gallon. Allow to cool to 65 degrees and add a packet of brewing yeast. Cover with plastic sheet, secure tightly with rubber band. Ferment in a warm place for ten to fourteen days. Then pour into a large jar with plastic and rubber band cover. Leave for a month. It can be bottled and kept up to a year if desired.

Have you ever wanted to have a phone number that was untracable and absent of the unpublished number charges that the phone kompany charges? Or have you ever needed a untracable license plate to use for a period of time? Well then we have two quick and dirty ways to do both, which are explained below.

UNTRACABLE PHONE NUMBER

- 1) Make up an alias name when getting your line installed and have the bill sent to a P.O. Box .
- 2) Tell the service representative NOT to give out any information for any reason unless they have a special code. This code could be anything- your favorite color, favorite porn star, serial killer, whatever. The only thing is to make should you remember your code, otherwise if you have a problem with the phone company- they won't give you or anyone else jack shit (seriously) for info.

WARNING- This method is legal as long as you pay your bill. Otherwise the phone company will come after for "intent to defraud."

UNTRACABLE LICENSE PLATE

- 1) Buy a two-three year old license plate at a flea market.
- 2) With a heat lamp peel off the old sticker (tag). Then go to the DMV, tell them you were in a hit and run and run the old license plate's number. If it comes back "No Record", then it's ok. If it comes back "Stolen" discard the license plate and find another plate.
- 3) Find a old junked motorcycle or car and register that vehicle in your name. Now you brought a new plate with new tag for a year.
- 4) Go through the same process with the heat lamp and remove the tag from the new plate. Then attach the new tag on the old plate with rubber cement.

WARNING- This method is VERY illegal. It's fine for an occasional or emergency use vehicle. If a cop runs your plate and gets "No Record" he'll assume a) you're an undercover cop or b) if he'll really suspicious he may decide to check you out. If you're in situation A, you're okay; but if it's situation B, you'll have some explaining to do.

The Devil goes on "Do you like to drink? Well on Tuesday we start off with fine wines, by afternoon we tap the kegs, and in the evening the hard liquor. By midnight we're slamming Tequilla with salt and a lemon.....and guess what NO HANGOVER!"

LIVER FAILURE DEPT

FREE ALCOHOL - It is said that one can 'liberate' laboratory alcohol from college laboratories. Look for anything called Ethanol (Ethyl Alcohol) NOT Methanol (which is highly poisonous) and bottles containing it may be marked 'USP'. Also you should use base litmus paper to test the alcohol- if it turns pink- let it be. This would mean that it contains small amounts of a laxative, to discourage people like us from drinking it! After opening the alcohol immediately cut it half and half with water then mix with punch or fruit juice.

LET THEM EAT GRASS DEPT.

Introduction to Living Off The Land

This subject of living off the land has been talked about and practically driven into the ground amongst survivalist circles. But the point is it is a skill that could one day save your life. Our experience in this area with us being city boys plus the fact we studied recognizing plants for known toxicity (i.e.- Castor Beans, Hemlock) rather than edibility is at best mediocre. However- there are three wild edible plants that are abundant in most urban areas and easily recognizable. You probably already know what they are I'm sure- they are Dandelions, Acorns, and Cattail.

Dandelion- This infamous pest of suburban lawns is supposed to be good eating. The leaves can be eaten raw in a salad or cooked. The flowers can be cooked or eaten raw as well. One good way of cooking the flowers is to first wash the flowers then fry them in a pan with butter, salt, and pepper until just before they bloom. The root which may extend for several feet can be used as a coffee substitute in the late fall, one simply cleans, dries, and grounds up the root. The root can also be peeled and boiled like potatoes. Another, interesting thing about Dandelion is that you make wine from the flowers too (although you'll at least a gallon to make it worth while).

Acorns- Acorns come from Oak tree, a common occurrence anywhere. Before eating these they must be shelled, split, and boiled for about 2-4 hours first to remove the bitter tannic acid. Afterwards the meat of the nut is roasted in a warm oven at about 300 degrees for an hour. The finished product can eaten fresh, ground into mush or flour. There's one candy recipe which one dip hauled acorn nuts in melted sugar and batter then allowed to dry and eaten.

Cattail- These plants commonly known for the brown spike growing on top of them are found in streams and ponds during the spring and summer. The sprouts can cut, shrubed, and peeled then they can eaten raw in salad or cooked for several minutes. The flower bud (the brown spike) can be eaten as well but should be boiled for 15 minutes. Afterwards, they may eaten like corn on the cob. I have heard they can be eaten raw too but I tried this one time while traveling and it tasted eating down insulation on a stick, so I wouldn't suggest it!

These plants are just the tip of the iceberg- hundreds more exist. Learning to know edible wild plants is truly an art- anyone wishing for more serious study on it should-

- 1) Get a good field guide for edible wild plants in the library or take a field trip with someone experienced in recognizing edible wild plants.
- 2) NEVER, NEVER eat wild mushrooms. Telling the safe from the deadly ones fools even many experts, plus nutritionwise they're worthless anyway. If you must have 'shrooms- go to a store if you're hungry or a reputable dealer if you want to trip but leave the wild ones alone!
- 3) Stay away from foraging in areas known to be sprayed with insecticides, herbicides, etc.

SEE THE DIFFERENCE!

Thyme Oil for Head Lice

Here in Hawaii, as with kids everywhere, head lice can be a problem. Instead of buying expensive treatments at the drugstore, we use thyme essential oil. Mix the thyme oil into your regular shampoo and wash the hair as usual, leaving the lather on the scalp and hair for five minutes. Rinse the hair well, apply a conditioner, and rinse again, then comb out the dead lice and eggs.

Peppermint Steam for Allergies

I suffer from allergies that dry up the mucus in my sinuses, causing awful headaches. I've found that breathing the steam of peppermint tea for just a few minutes helps tremendously. Before discovering this remedy, I was taking aspirin around the clock to relieve pain. Breathing peppermint steam has cut my use of aspirin by 75 percent.

change for your services (productive effort, the use of your money, etc.).

2. You can find a gun and use it to rob people.

3. You can find a printing press and print the currency.

For the government, method 1 is out, of course. The government's only purpose in the market is coercion. It isn't created to make exchanges with individuals on a voluntary basis. People appeal to the government only when voluntary methods have failed—when they want someone to be forced to do something.

Method 2 is, of course, the basic revenue-raising activity of the government. Although the tax collector doesn't appear at your door with a gun in his hand, his effectiveness stems from the people behind him with guns and jails.

A company such as General Motors doesn't tax you; it offers a product which you can choose to buy or not. But the only alternatives to paying taxes are going to jail or having your property confiscated.¹

The government can also borrow the money it wants. If it refuses to repay it, it's using method 2 again—this time against the lenders. If it does repay the money, it must resort to method 2 to raise the funds from the taxpayers.

In addition, if the money is borrowed, it will lower by an equal amount the money available to be used in private investment. The money is clearly removed from productive use, so a more invisible method is required.

The government resorts to method 3 to augment its tax revenues. In effect, it prints more paper money receipts than it has gold in storage to back them. This is inflation.

In modern times, the government doesn't inflate by using the printing press in such an obvious way. Instead, it sells its bonds to the central bank (the Federal Reserve System in the United States) which creates a fictitious checking account deposit in payment. The government then writes checks as if they were backed by real money. The effect is exactly the same as if paper currency had been printed.

Inflation

WHEN GOVERNMENTS OPERATE the gold warehouses, they invariably issue more paper money than is warranted by the gold in storage.

We saw in Chapter 5 that the government might face resistance if it tried to tax the people directly for every expenditure it wants to make. If the citizens knew that 30-50% of their productive efforts were being expropriated by the government, public hostility might be enough to cause changes.

So the government favors so-called "hidden taxes" (import duties, corporation taxes, license fees, etc.) because consumers aren't aware, in most cases, that they're paying them. But the government's ultimate weapon is an invisible way of extracting resources from the General Market; it's called *inflation*.

Inflation is the issuance of paper currency for which there's no gold (or other commodity) in storage. Since currencies are originally intended to be receipts for actual gold, inflation is nothing more than the counterfeiting of paper money.

WHY INFLATION?

If you want to acquire \$50,000, there are three basic methods by which you can obtain it:

1. You can find people who will pay you that much in ex-

MONEY

Paper isn't money. As far as I know, no civilization has ever used the commodity paper as money. But many governments have issued paper money receipts for gold, then withdrawn the gold out from under the paper, leaving the paper with no inherent value.

In all such cases I've been able to discover, either the paper currency became totally worthless or gold was reintroduced eventually to back it—but not before there were very bad consequences.

Paper isn't money. As a substitute, U.S. paper money was once "as good as gold." But when you can no longer exchange it for gold, you can't expect it to retain its value.

It may continue to be accepted in exchange years after the gold backing has been removed, because a sufficient momentum has been established. But it's only a matter of time until people start fleeing from the currency—trading it for gold, silver, or stronger currencies.

And when that flight begins, you can be sure that the weak currency is in its terminal stage.

TAXATION ABOLITION

Every day millions of blind mice face extortion at Uncle Skam's hands. Automatonik suckers submitting to the greatest fraud on earth. Paying wage slaved earnings to the plutocratik piper's pit. Coerced funding to a merciless system that rubs our faces in its shit.

Government tentacles snatching your fistful of dollars. Taxation is organized crime, fucking highway robbery. Intimidated oppressed pay for their own oppression. Time for nationwide tax revolt and total taxation abolision.

Income tax, property tax, sales tax, and hidden taxes. All enforced embezzlement, use 1040's for fireplace kindling. Drowse tax collectors in gasoline and roast the fuckers alive at the stake. Fuck the IRS and live off the books. Whose cash is it anyway and audit the state for its worth.

Save you \$ome dough!

The Bronx

It's home to crime, violence

By PATRICE O'SHAUGHNESSY

Daily News Staff Writer

The death penalty firestorm rages on a most fitting battleground.

In the Bronx, pervasive poverty and crime have fed off each other for so long that violence is the backdrop of many neighborhoods.

The Bronx has the city's highest murder rate; it is a borough plagued by career criminals, nurtured in environments where prospects are bleak. "The biggest employer is the drug business," said Mark Naison, director of urban studies at Fordham.

The Bronx has the largest number of paroled criminals of any borough. A report by the Vera Institute of Justice said that in 1993, four areas of the Bronx — South Bronx, Soundview, Morris Heights and University Heights — had more than 750 parolees each. Three other neighborhoods had at least 500.

The Bronx is second to Brooklyn in the number of Rikers Island inmates and the number of people on probation.

Nearly 25% of the 7,021 children detained by the city Juvenile Justice Department last year were from the Bronx.

There are 1.2 million people in the borough, which last year logged 304 homicides, a rate of 25 per 100,000 residents. It was a significant decrease from 1994, when there were 393 killings, for a rate of 32 per 100,000.

By comparison, Brooklyn, with 2.3 million residents, had 387 homicides last year, for a rate of 16 per 100,000.

The Bronx, too, leads the city in unemployment, public assistance and public housing.

BOOK REVIEWS

THE COMING PLAGUE- BY LAURIE GARRETT

A very long book (600 pages+) which examines the possibility that a second "black death" sort of plague may ravage the earth. This isn't some kooky krackpot shit- it very well researched with excerpts from the world's best microbiologists. It explores terrifying scenarios like nasty buggies such as Lassa Fever or Elboa spreading into the western world, ghettos here as breeding grounds for antibiotic resistant strains of Tuberculosis and Measles, AIDS mutating into something that could be spread like the Common Cold, or viruses that make you bleed from every pore in your body- well enough. Anyway- just reading it made me piss in my pants. This is some very scary shit.

HOW TO DIE IN THE OUTDOORS, 100 INTERESTING WAYS- BY BUCK TILTON

This is a hysterical book about outdoor injuries and deaths in which humyns could face at the hands of animals. There's your usual deaths like rattle-snakes, sharks, lions, etc. But it also describes lesser known creatures like Candiru fish, komodo dragons, or screwworm filies. One story describes how one poor guy was swallowed by a sperm whale or how giant coconut crabs cracked open the skulls of 26 sleeping people because they mistaken the hairy heads for coconuts.

REWARDS OFFERED BY THE U.S.- BY LARRY M. DREYFUS

Not many books peeked my emotions (in anger) as this one. On the back the book boast how to get millions of dollars just a phone call away- and its claim is true. However- it should be titled "Being a Snitch Made Easy" because this book is a how to and where to guide on turning in krimnals. Informers on tax evaders to the IRS receive a percentage of backtax obtained. One who knows a fugitive wanted by FBI or DEA can earn up to \$25,000. If one knows a moon-shiner, gunrunner, or bomb freak this book states the ATF (assholes!) would pay big bucks to know about it. Information on presidential threats could be worth up to \$100,000. One can even rat on military deserters for \$500. So if you wanted to be a "Judas" and drop a dime on a family member or friend for a fistfull of dollars this book is for you. Likewise, if see a "friend" reading this you should to disassociate yourself from them as soon as possible.

LIVING POOR WITH SYTLE- By Ernest Callenbach

This book was written in the 70's so some of the content is a bit dated but it's filled with tons of tips and information for people that are whether by circumstances or choice- poor. Its format is divided into different sections such as keeping healthy, getting money, learning new skills, eating and dwelling. It even has special chapters on raising kids, dealing with the law, and avoiding the draft (obsolete now). Being about 600 pages in length- this book pactly covers all the bases of living well cheap. Anyone who reads this will learn something new. This is probably one the best urban type survival guide I ever seen.

PRISON SHIP- By Martin Caidin

This almost 600 page science fiction horror novel is about six interstellar convicts whom escape the clutches of their robotik screws, crash land on Earth, and hook up with six multiple-life term prison cons who run the joint from the inside. The beauty about this novel is that it's violent to the extreme. One scene that comes to mind is during an attempted gang rape by four cons the would be victim manages to chew the lips and cheeks off one, rip the nostrils of another, gouge the eyeball of one more, and deskinning the dick of the final one whom had a hard-on and a shiv. Another favorite scene is when the humyn consgive a welcome feast to their alien counterparts complete with liquor, drugs, and professional hookers; one of the aliens gets too loaded thus turning into a raging sex maniac whom ripping off the clothes of his 'date' then raping her and breaking her neck in front of everyone. It also happens that the alien has a barbed tipped cock that shoots acid cum so as you can imagine it gets pretty ugly. In fact, most of this work is very ugly- people are slaughtered. One guy gets burned alive and chopped into pieces that are mailed to his family. One loser of a knife fight is disposed of by being grinded into dog food. Snitches are punished by being pumped up full of heroin and crack then locked in the 'hole' incommunicado to go cold turkey in agony. The 'warden' is kept in line by having his wife and kids held hostages by pedophiles and violent sex offenders. Another poor soul has his guts eaten while still alive by two of the aliens. Just a few examples all presented in the raw reality of prison life. The author even warns the reader throughout the book when the most graphic parts are coming in case he/ she is too wussy to read them. If you love sex and violence with a twist of sci-fi this book is for you!

2nd GENERATION PANORAMIC

like no
has ever
before.

DWELLING PORTABLY- May '96- P.O. Box 190, Philomath, OR 97370. \$1 postpaid. This is a small but very useful zine done by a couple living in the wildness with dozens of handy tips for living a frugal lifestyle in tents, vehicles, and boats. There is also a large article about living in a school bus and some very good book reviews.

WALTER MITTEY PAPERS- #23-

James M. Dakin, P.O. Box 221, Collinsville, OK 74021. 50 cents for a sample copy.

This one is a two-page newsletter devoted (as it says) to the armchair survivalist with articles on gun control, surplus rifles, militias, and a reprint of the article "Republicans Call for End of Emergency War Powers", which are still enforced even though the emergencies have passed.

CATCH 22- #5- 4915 Woodbury Dr., Erie, PA 16510-6413. \$1 postpaid.

Here is one with an interesting mishmash of topics from Microsoft monopolizing the komputer industry to interviews with an ex-Camp Hill prisoner and an Austin graffiti crew known as KLI 35. However- the areas that really got my attention was the stuff on ATM scams, komputer viruses, and making your own orange phone box.

If we could just get everyone to close their eyes and visualize world peace for an hour, imagine how serene and quiet it would be until the looting started

The nice folks at Loompanics sent us these excellent two books to review.

DAVID'S TOOL KIT- Citizen s' Guide to Taking Out Big Brother's Heavy Weapons By Ragnar Benson.

The title of the book speaks for itself. Hear within this volume the author (a well known writer of numerous survivalist publications) illustrates techniques and advice to the lay citizen seeking to defend against and neutralize tanks, helicopters, APC's, jets, jeeps, and artillery. Benson in the introduction warns that our government has been increasingly using heavy weapons such as tanks and choppers against U.S. citizens usually under the guise of 'Drug enforcemnt'. Fortunately, it has not reached the level of banality as known in many third world nations but if it does the information herein will give one a fighting chance. Chapters are devoted to tank warfare history; using sabotage tools including molotovs, claymores, and smoke; and separate ones for each classification of heavy weapons complete with illustrations, pictures, and identification charts. Recommended beyond a doubt!

VEST-BUSTERS: How to Make Your Own Body-Armor Piercing Bullets. By Uncle Fester

Again the book's title speaks for itself. Body armor (aka- bulletproof vests) while far from being superman suits increases ones chance of surviving a gunfight if one is hit unless the assailant has loaded his gun with telfon coated bullets which can penetrate kevlar. These bullets now highly illegal can following the procedures herein be made by anyone regardless of technical background safely and covertly. Uncle Fester clearly explains the types of kevlar vests, types of bullets best suited for telfon coating, sources of the chemicals needed, and finally the complete coating procedure itself. Recommended to those whom wish to give vest wearing thugs, gangbangers, cops, or BATF troops a big lethal surprise!

like lice/ Your civilization is koncentration kampf run by its own inmates/
Your statue of limitations has expired/ Do goddess a favor and torch
yourselves beyond recognition.

HOME REMEDIES

Vinegar for Fungal Infections

For any yeast or fungal infection, whether it be on the scalp or the soles of the feet, apple cider vinegar rinse never fails as a cure. I find it works best when used straight and heated to a comfortably warm temperature.

Heal Boils with Turmeric

Not long ago I developed a boil, which caused my arm to swell to twice its normal size. My aunt warmed a teaspoon of ghee (clarified butter) and added enough turmeric powder to make a paste. She spread the warm paste on a piece of gauze, applied it to the boil, and covered the gauze with a bandage. When I awoke the next morning, my fever was gone and the swelling had subsided.

Native American Diarrhea Remedy

My mother uses the following remedy for diarrhea and vomiting, which was handed down from her Cherokee ancestors: Cut a small branch from a peach tree and immediately scrape about two teaspoons of the bark into a cup. Fill the cup with boiling water and cover for two minutes. Take one teaspoon of the liquid, followed by another teaspoon one hour later if necessary. The tea has a bitter taste—but is not unbearable—and is soothing to the whole gastrointestinal tract.

DRUNKEN, PARANOID,

LOW-CLASS BUMS!

Poison Pen #1

\$1.25 + 2 stamps / S / 26 pages

This could best be described as a militant crusty-punk version of the Poor Man's James Bond complete with paranoid, doom-ridden dilutions of societal breakdown (a real Orwell-Huxley scenario with Amekix as the soundtrack). All kinds of articles on subjects like surviving the on-coming cataclysm, urban warfare, improvised weapons and street justice (a very primitive form of the anarchist concept of community justice), as well as technical information on such things as breaking into buildings, primitive cryptology, surveillance devices and more. Pretty crude politically but very utilitarian in the face of the on-coming darkness ahead of us... don't be caught unprepared—dig your bunker now!

Poison Pen #1 (\$1.25 each/cb Daniel Santiago 1870 Schieffelin #56/ Bronx NY 10466)

This is a survivalist oriented zine focusing on how to prepare for coming kaos. Basically how to fight the system and to come out on top when it falls down—There's a lot of good basic info which is good for anyone to think about (equipment and preparations for basic survival) and then a lot more with a conspiracy slant to it. Learn about police scanners, self defense, how to be invisible from the man and create a new identity, hiding places, writing in code, forcible entry and creating ID. **Poison Pen #2** More of the same. Small-scale survival portable kit, more on self-defense, escape and evasion, surveillance, mischief, smuggler hiding spots, credit card crimes and fraud by phone, how to cook small animals (yuck), surviving abroad (reprint), homemade herbal remedies, survival Spanish, and overall some really interesting stuff and good material. Though for me personally the survivalist skills appeal to me, the guns, violence, criminal conspiracy kinda stuff does not.

Poison Pen #3 (\$2/ D. Santiago 1870 Schieffelin #56/ Bronx NY 10466)

I really liked the last 2 issues which has a lot of DIY survivalist information which was useful and helpful. This issue has gotten much more militant and violent, with more coverage of guns and how to make bombs—stuff which is actually pretty scary in it's destructiveness. I agree with empowering yourself and fighting the system, but I'm still supportive of positive pacifist approaches myself. Info on survival foods, making your own yogurt, communication security, terrorizing scams and direct action, DIY generators, unbomber, chemical warfare more.

POISON PEN #1-23 PAGES- SURVIVING KOMING KAOS/ SCANNING/ IMPROVISED WEAPONS/ BREAKING + ENTERING/ HIDING SPOTS/ PRIVACY TIPS/ CODES/ RANTS/ + MORE.
POISON PEN #2-28 PAGES- MAKING BUG OUT KITS/ IMPROVISED WEAPONS/ SURVIVING ABOARD/ CREDIT CARD FRAUD/ DOG, CAT, + RAT RECIPES/ SURVEILLANCE/ + MORE
